

NEW LecternPro Higher Quality. Lower Price

Improved Build Quality.

Updated factory tooling and construction processes have given the IMAGE LecternPro professional lectern a new level of finish and authority that is so important for speakers when they are in the spotlight.

More space has been provided inside the platen top on the new models, giving them more room to fit control panels etc inside.

Higher Quality means Lower Prices.

That probably sounds like a contradiction, but in fact, the improved production techniques used in the manufacture of the LecternPro series of lecterns are much more efficient - which means our costs are lower.

And that means your costs are lower. (Around 25% less on the popular LS300 model.)

Basic and Executive models are available as before, with similar corresponding options.

IMAGE LecternPro Series

Lectern **Executive** LE500, LE400
 Lectern **Standard** LS300
 Lectern **Control** LC300
 Lectern **Basic** LB200, LB100

A professional looking lectern for true professionals.

The Lectern Pro series offers a range of options in appearance and functionality;

From the Basic 100 and 200 models, with no accessories, through to the Executive 400 and 500 models, which can include such features as a built-in 40W amplifier, gooseneck microphone, gooseneck desktop light, LCD clock, and hand-held UHF microphone. (See specifications below for options)

Alternatively, the Control 300 model affords mastery over the presentation environment i.e. from your lectern you can control TV displays, lights, audio, motorised screen, curtains, projector lift etc.

Lectern Pro series lecterns are light but strong, aluminium framed with a rippled black or rich silver powdercoat finish – complemented by black or slate coloured fabric infill panels (Standard Twill Range).

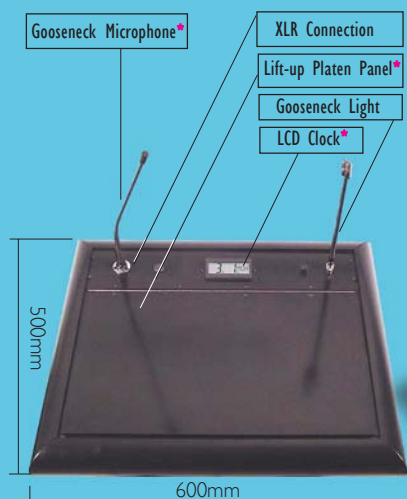

When the speaker is the centre of attention, the LecternPro provides a strong focal point – the professional IMAGE.

LB200S Tabletop Lectern

LS300S Full Height Lectern
